

Product FAQ — SmartHome Hub X1

What is the SmartHome Hub X1?

The SmartHome Hub X1 is a central control device for your smart home ecosystem. It supports Zigbee, Z-Wave, Wi-Fi, and Bluetooth protocols, allowing you to connect and automate up to 200 devices from a single app. It also works with Amazon Alexa, Google Assistant, and Apple HomeKit.

What devices are compatible?

Hub X1 is compatible with the majority of major smart home brands including Philips Hue, LIFX, Nest, Ring, Ecobee, August, Yale, Schlage, TP-Link Kasa, and hundreds more. A full compatibility list is available at hub.example.com/compatible-devices. New device integrations are added via automatic firmware updates.

How do I set up the Hub X1?

Setup takes about 10 minutes. Plug the Hub into power and your router using the included Ethernet cable. Download the SmartHome app (iOS or Android), create an account, and tap 'Add Device' ! 'Hub X1'. Follow the in-app instructions to complete pairing. Wi-Fi setup is also supported if an Ethernet connection is unavailable.

Does it require a subscription?

Basic local control is completely free with no subscription required. The optional SmartHome Premium plan (\$4.99/month or \$39.99/year) adds remote access away from home, advanced automation rules, multi-user sharing, cloud backup of device settings, and AI-powered energy usage reports.

What happens during an internet outage?

Hub X1 can still control all locally connected Zigbee, Z-Wave, and Bluetooth devices during an internet outage. Wi-Fi devices that rely on cloud services may be unavailable. Schedules and automations stored on the Hub continue to run without internet. Voice assistant commands require internet connectivity.

How do I reset the Hub X1 to factory settings?

Hold the reset button on the back of the Hub for 10 seconds until the LED flashes red. The Hub will restart and return to factory defaults. All paired devices and automations will be erased. You can re-pair devices after setup. If you have a Premium account, you can restore your device configuration from the cloud backup.

What is the warranty on Hub X1?

Hub X1 comes with a 2-year limited warranty covering manufacturing defects. Physical damage, water damage, and damage from unauthorized modifications are not covered. To make a warranty claim, contact support@hub.example.com with your proof of purchase and a description of the issue.
